

REMARKS

This Request for Continued Examination is being filed pursuant to the provisions of 37 CFR 1.114 and is being filed in order that newly presented Claims 6 and 7 be entered into the prosecution record of the present application. Applicants hereby incorporate by reference thereto the arguments made in the Request for Reconsideration and again point out that the objective test data of record in the present application is more than sufficient to establish the patentability of the presently claimed invention. Applicants are also filing a petition to delay the examination of the present application at least three months in order to afford Applicants the opportunity to prepare and submit additional test data that establishes the patentability of the presently claimed invention over the prior art cited by the Examiner. Favorable consideration is respectfully solicited.

Respectfully submitted,

Terryence F. Chapman
